Aiming, running, the whole thing. Just bad. Idea is probably the ONLY thing that is good. Guns, people killing people. Yeah, that idea. That is all. The game is crap. Almost no players.. I picked this up on a whim when the Lunar Pack was on sale, and I've been very pleasantly surprised and pleased with the game. It's a nice little platform-puzzler, especially for the Lunar pack price.

Enjoyable if:

- You like games with very little guidance--there's no tutorial and there are no hints or clues.
- You like games with an atmospheric story rather than a written or spoken dialogue (there are only a few symbols, no text, as far as I've played)
- You like games where you can find your own way
- You like pixel art.

If, on the other hand, you prefer games with lots of hints, levels, and a clear game trajectory, this is probably not a game you'll enjoy.

Small drawbacks: There's no way (that I've discovered) to restart the game if you get stuck in certain areas of the game, other than quitting and restarting the game. This is only a real problem at the beginning, though, before discovering moves like the double jump. As progress in the game is saved, this is only a minor annoyance. Also, occasionally the various filters are a bit much.

Overall: 8V10. Lame. Took like 15 minutes and so predictable. Like bad D&D. Got it in a bundle for pennies and still feel like I was robbed, which seems ironically appropriate.. Great addition for solo skirmish and multiplayer challenge. very active development, looking forward to seeing where it goes!. I'm definitely out of the target age bracket for this, but I can still appreciate it for what it is. The graphics were definitely a good idea as, even though they look dated, the black and white simplified style makes sure they still work perfectly and look decent on modern systems. Therefore, this is a great game for kids. It is a point-and-click adventure, but without the puzzles, inventory, or other higher-level things you are likely used to in such games. Rather, it's all about just clicking things to see what they do, with fun things like typewriters, painting easels, telephones, and other things included that you can click on and play with. For myself, the initial amusement faded rather quickly, as I want more out of a game, but I still recommend it for those that don't need more than that, because it is well made and would no doubt be entertaining for a long while for the right players. Really, it's more than worth it as a bonus game in the bundle.. A solid, traditional tower defense game. This is a complete game (no horrible micro-transactions), and it is well made. Fans of the genre will enjoy the game.. **Pros:**

- Altera

Cons:

10V10 Good Civilization. I like it. I enjoyed wearing it in snowy areas to fit the theme. Although it's only worth it in a bundle. Don't bother buying it individually.. I remember buying this. I feel horrible.

I recently met one of the friends of developers and promised to write a review. However, I realized that I DID already write one. It's not in english so why bother post the link? Well, here it is just in case someone could actually read it

I do recommend this game and others in the franchise because they are simulations. They make you care about your farm. Focus is on farming and survival as farmer. It's not game of shiny toys and driving heavy machinery, it's for hardcore virtual farmers. Period.. This game is so much fun. Can't believe it is so cheap. Must buy for me.. this is kinda hard. It did not have a lot of rewarding skill involved. Compared to games like towerfall and duckgame this has very little local multiplayer progression. Also it lagged quite a bit.. It has multiple endings with old school gameplay. A Great game with replayabilty. 9/10
